CONTENTS

Volume 46 (1990)

Special Issue — Symposium of Forensic Sciences 'Criminalistic Traces'

Editors Note and Introduction 1
Specific features of poisoning 3–5
by J. Markiewicz and Z. Chlobowska (Cracow, Poland)
Identification features of traces 7–10
by H. Kolecki (Poznań, Poland)
Determination of ABO antigens in fingernails using the APAAP (immunoalkaline phosphatase) technique 11–14
by R. Wegener and U. Bulnheim (Rostock, G.D.R.)
The use of computer in criminal proceedings. A case report 15–16
by A. Forker (Jena, G.D.R.)
The determination of drugs and their substitutes in human hairs 17–18
by W. Arnold (Hamburg, F.R.G.)
Detection, preservation and examination of traces of unusual environment poisoning .. 19–21
by D. Tiess, H. Mennenga and J. Duty (Rostock G.D.R.)
Experience of the Institute of Technical Expertise in the examination of criminalistic traces 23–25
by O. Mueller and A. Nádasi (Budapest, Hungary)
Human factors in expert work 27–28
by I. Kertész (Budapest, Hungary)
Detection of latent fingerprints: application of cyanoacrylate for the inside of cars..... 29–30
by L. Karlinszky and G. Harkai (Budapest, Hungary)
Experimental study of using cyanoacrylate ester vapour for developing latent fingerprints 31–32
by H. Howorka and K. Kretschmer (Berlin, G.D.R.)
Authenticity judgement with the help of paint-brush traces 33–35
by L. Ionescu (Bucharest, Romania)
Paint examination using thin paint sections 37–39
by D.K. Laing (Reading, U.K.)
Latent evidence 41–45
by E.F. Pearson (London, U.K.)
Determination of the causes of fires and explosions by the analysis of biological materials 47–50
by D.R. Chambers (London, U.K.)
Usefulness of two methods of isoelectric focusing for the erythrocyte acid phosphatase phenotypes determination in human bloodstains 51–54
by R. Pawlowski, S. Raszeja, G. Komocka and S. Kuczyński (Gdańsk and Warsaw, Poland)

Graphic test as a method for estimation of testator's psycho-physical condition 55–61
by M. Legien (Katowice, Poland)
The influence of spontaneous writing on stability of graphic features 63–67
by T. Widla (Katowice, Poland)
Situational aspects of pseudonyms 69–75
by A. Felus (Katowice, Poland)
Theoretical and practical problems of traces 77–78
by B. Holyst (Warsaw, Poland)
On so called traces of omission 79–81
by T. Hanausek (Cracow, Poland)
Decoding of memory traces as a function of witness' intelligence 83–85
by J. Wójcikiewicz (Cracow, Poland)
Determination of phosphoglucomutase phenotypes in hair bulbs 87–89
by Z. Parkitna-Cegla and T. Dobosz (Wroclaw, Poland)
Effectiveness of diffraction methods in identification of metals 91–93
by E. Blachnia and M. Haś (Warsaw, Poland)
Polymorphism of isoenzymes in preserved muscle tissues 95–99
by Z. Szczerkowska (Gdańsk, Poland)
A new method for comparison of paper samples 101–104
by C. Grzeszyk, P. Struzewski and L. Szymanski (Warsaw, Poland)
Infrared spectroscopy of ballpen paste 105–109
by B. Trzcinska (Cracow, Poland)
Development of fingerprints with laser 111–115
by J. Kamiński (Warsaw, Poland)
Indentification of narcotic substances in hemp 117–120
by C.W. Szulc, R. Zarzecka and A. Szuchnik (Warsaw, Poland)
The examination of photocopy documents 121–126
by R.N. Totty (Gwent, U.K.)
n-Butanol in blood as the indicator of how long a dead body lay in water 127–128
by W. Gubala (Cracow, Poland)
Drug addiction in Poland and criminalistic traces 129–132
by M. Kala and R. Borkowski (Cracow, Poland)
Determination of age of fingerprints 133–137
by K. Baniuk (Warsaw, Poland)
Identification of explosive materials 139–142
by T. Baran (Warsaw, Poland)
Gnosiological prerequisites of trace interpretation process 143–144
by M. Protivinský (Prague, Czechoslovakia)
Possibilities of cheiloscopy 145–151
by J. Kasprzak (Mińsk Mazowiecki, Poland)
Preservation and use of traces revealed during the search of the scene of burglary 153–158
by E. Gruza and T. Tomaszewski (Warsaw, Poland)
Modern criminalistic expertise 159–162
by T. Rydzek (Warsaw, Poland)
Panel session – The possibilities and limits of criminalistic technique 163–164
Diary of Future Events 165–166

Positive and negative-ion mass spectrometry and rapid clean-up of some carbamate pesticides 169–180
by O. Suzuki, H. Hattori, J. Liu, H. Seno and T. Kumazawa (Hamamatsu and Aichi, Japan)
Prediction of stature from hand measurements 181–187
by A.K. Abdel Malek, A.M. Ahmed, S. Abd El Aziz El Sharkawi and N. Abd El Maksoud Abd El Hamid (Assiut, Egypt)
Injuries due to deliberate violence in Chile 189–202
by O. Aalund, L. Danielsen and R.O. Sanhueza (Copenhagen, Denmark)
'First pass phenomenon' of inhaled gas in the fire victims 203–208
by K. Matsubara, A. Akane, C. Maseda and H. Shiono (Izumo, Japan)
Let's do it by numbers 209–218
by R.A. Huber and A.M. Headrick (Ottawa, Canada)
Gas chromatographic-mass spectrometric confirmation of radioimmunoassay results for cannabinoids in blood and urine 219–230
by A.J. Clatworthy, M.C.H. Oon, R.N. Smith and M.J. Whitehouse (London, U.K.)
A sensitive enzyme-linked immunosorbent assay used to differentiate type AB specimen from a mixture of type A and type B specimens 231–242
by M. Sato, K. Higashide and Y. Katsumata (Nagoya and Chita, Japan)
Hair analysis for drug abuse, Part II. Hair analysis for monitoring of methamphetamine abuse by isotope dilution gas chromatography/mass spectrometry 243–254
by Y. Nakahara, K. Takahashi, Y. Takeda, K. Konuma, S. Fukui and T. Tokui (Tokyo and Chiba, Japan)
A study on the vital reaction in wounded skin: simultaneous determination of histamine and polyamines in injured rat skin by high-performance liquid chromatography 255–268
by Y. Maeno, F. Takabe, H. Inoue and M. Iwasa (Nagoya, Japan)
The forensic value of right-hand justification 269–273
by T.W. Vastrick (Memphis, TN)
Precision of estimating the time since death by vitreous potassium — comparison of two different equations 275–282
by B. Madea, N. Herrmann and C. Henbge (Köln, F.R.G.)
Sudden unexpected death due to familial hypertrophic obstructive cardiomyopathy 283–286
by R. Fernando (Colombo, Sri Lanka)
The significance of detecting serum fluorine level in the diagnosis of drowning 287–292
by C. Yu-Chuan, D. Zhao-Ke and Z. Jia-Zhen (Guangzhou, China)
Diary of Future Events 295–296
